

Dear Healthcare Provider,

The purpose of this letter is to request your assistance. The Mowat-Wilson Syndrome Foundation has established a patient registry whereby we are collecting information of individuals with MWS. The information is being used for research and learning more about the syndrome. Our next questionnaire is focusing on growth patterns and we are asking for information to formulate growth charts that are specific to MWS. To complete this section, we will require growth measurements for weight and length, birth to present. We will also need head circumference for at least the first 2 years and longer if possible.

We would very much appreciate your assistance in providing this information to your patient's family for them to upload into the registry. In turn, this information will prove to be a valuable tool for physicians such as yourself in determining a "normal" growth pattern for your Mowat Wilson Syndrome patients in the future.

We sincerely thank you for your assistance in the matter,

The Board of the Mowat Wilson Syndrome Foundation
